

How to EMBED a Quote

Doing it correctly, making it sound good, and including the source information

Remember: I'm doing my research on dog ear infections because I want to know more about why my own dog gets ear infections so often?

I found a quote that I like from the www.akc.org website that talks about how important it is for dog owners to work with their vets to really figure out the cause of the ear infection. There's this one part in that online article that says "But compared to your dog's discomfort, they're a small price to pay to identify the culprit."

The author is talking about how there are different things owners can try to do to figure out the cause. So I like that particular sentence because I like the "culprit" part :)

I don't want to use the whole sentence, though. I just want to use the "small price to pay to identify the culprit."
